

ตาราง ค่าวิกฤติของ $T_{xy,z}$ สำหรับการวิเคราะห์ Kendall partial rank-order correlation coefficient

N	α							
	.25	.20	.10	.05	.025	.01	.005	.001
3	.500	1.000						
4	.447	.500	.707	.707	1.000			
5	.333	.408	.534	.667	.802	.816	1.000	
6	.277	.327	.472	.600	.667	.764	.866	1.000
7	.233	.282	.421	.527	.617	.712	.761	.901
8	.206	.254	.382	.484	.565	.648	.713	.807
9	.187	.230	.347	.443	.515	.602	.660	.757
10	.170	.215	.325	.413	.480	.562	.614	.718
11	.162	.202	.305	.387	.453	.530	.581	.677
12	.153	.190	.288	.465	.430	.505	.548	.643
13	.145	.180	.273	.347	.410	.481	.527	.616
14	.137	.172	.260	.331	.391	.458	.503	.590
15	.133	.166	.251	.319	.377	.442	.485	.570
16	.125	.157	.240	.305	.361	.423	.466	.549
17	.121	.151	.231	.294	.348	.410	.450	.532
18	.117	.147	.222	.284	.336	.395	.434	.514
19	.114	.141	.215	.275	.326	.382	.421	.498
20	.111	.139	.210	.268	.318	.374	.412	.488
25	.098	.122	.185	.236	.279	.329	.363	.430
30	.088	.110	.167	.213	.253	.298	.329	.390
35	.081	.101	.153	.196	.232	.274	.303	.361
40	.075	.094	.142	.182	.216	.255	.282	.335
45	.071	.088	.133	.171	.203	.240	.265	.316
50	.067	.083	.126	.161	.192	.225	.250	.298
60	.060	.075	.114	.147	.174	.206	.227	.270
70	.056	.070	.106	.135	.160	.190	.210	.251
80	.052	.065	.098	.126	.150	.178	.197	.235
90	.049	.061	.092	.119	.141	.167	.185	.221
